

# Clear River Electric & Water District's Water Service Line Protection Program

CREW is pleased to announce the implementation of a program designed to give our residential water customers peace of mind!

We offer a Water Service Line Protection policy, that will insure your water service line from curb-stop shut-off, to the water meter. Currently, the home owner would be responsible for any repairs to the water service line on their property.

The Water Service Line Protection policy would pay up to \$3,000 per occurrence to repair your water service line and \$2,000 per occurrence for such repair to the same section of public sidewalk or public road.

The cost of the Water Service Line Protection policy is \$5.00 per month. A charge in that amount, would be added to your water bill each month, if you choose to participate.

For more information, please call the District office at  
(401) 568-6222.

Terms and Conditions can be found at [www.crewri.org](http://www.crewri.org).
